Murray spoke to an audience of around 100 Vodafone people leaders last week and he was outstanding. From the moment he arrived to the moment he left he had every member of the audience completely engaged...and like all great performers Murray finished with people wanting more. His energy and passion were truly infectious and the personal stories he told throughout his presentation not only made us all laugh but importantly made us all think. I look forward to the day we welcome Murray back to Vodafone.

You own a Company. You bring your team together. And you want them to leave the meeting inspired... then Murray Thom turns up.

In a time when there are so many voices calling out for our attention, so many distractions, let me put it this way, when Murray speaks he commands attention. The distractions faded away and I found myself quickly immersed in the conversation.

Murray is well deserving of a keynote speaker role at any conference. He spoke to an audience of over 200 Mortgage & Insurance advisers, including high-level executives from our major banks and insurance companies. Murray speaks with such fervor, you can't help but be drawn into his world which makes you question, "What the hell am I doing with my life"?

It's so great to hear stories from Kiwis reaching major success not only in local markets but internationally. If you truly want an inspiring, creative entrepreneur who won't bore the tits off the crowd whilst gaining respect from the most conservative and successful people, Murray Thom is your man.
